socialcircles

a free set of simple, attractive, social icons

introduction

For those of you who may not know me let me introduce myself - I'm Robby, a UK Freelance Web Designer based in Devon. I regularly release freebies, the idea being that it exposes my work to more people who may go on to become treasured clients of mine.
You can see the whole collection of my freebies at DeviantArt: http://robby-designs.deviantart.com/ visit my site at http://www.robbydesigns.com , or even follow me on Twitter: http://twitter.com/robbydesigns , maybe even take a look at my Blog where I post all my latest news, inspiration, freebies and more: http://www.robbydesigns.com

When I originally created this icon set on 11th Jan 2013, there wasn't any real inspiration other than my love of minimal, clean design (which thankfully is the current trend). There's a lot of social icon sets around so I wanted to treat you to something different and here it is.
All I ask is that you spread the word about my work. Thanks and enjoy!

CHANGE LOG: Added DeviantArt, FourSquare, Pinterest, Instagram, RSS icons on 5th Sept 2014.
Added many more icons including the requested SoundCloud icon on 5th Jan 2015.

license

YOU CAN
: You have rights to use this resource for personal and commercial design works.
: You may modify the resources according to your requirements and use them in any or all of your personal and commercial projects.

YOU CAN'T
: You **do not** have the rights to redistribute, resell, lease, license, sub-license or offer the file download to any third party.
: Webmasters must link to the download page on my DeviantArt account or my website, **you may not** hotlink to the zip.
: For any resalable design template, web applications or software programs, you should not include this resource as an additional attachment. This will be considered as a redistribution which is forbidden.
: You may not claim this resource as your own.

how to edit

As long as you have a basic grasp of Photoshop you will be able to edit the included PSD quickly and easily.
If you'd like to change the colour of the 'base' (the circle) you can do so by simply adding a color overlay. If you'd like to change the colour of the icons you can click on their colour mask and change it to the desired colour where applicable or simply add a colour overlay. Some icons use the free 'FontAwesome' font.
Enjoy!
